

## Human Anatomy Spring 2010

### Assessment

SLO #5: Safely and efficiently set up and operate laboratory equipment.

Each student was observed at various points throughout the lab. Counts were taken as to how many students were acting in a safe and efficient manner. If not safe and/or efficient, a note was made of the specific issue.

Criteria for "safe and efficient": not likely to injure self or others, following specific directions regarding safety, following directions of the lab activity, performing necessary activities to accomplish goals for the lab, not doing any unnecessary activities.

Tuesday, May 4, 2010

Lab activities included: sheep heart dissection, looking at slides using microscopes, observing models

Time	Safe	Not Safe	Efficient	Not efficient
9:30 am	20	0	18	2 (students chatting, not working on lab activities)
10:15 am	22	0	22	0
10:45 am	18	0	18	0
11:00 am	19	0	19	0

100% of students safe during all observations

2 observations out of total 77 not efficient

97% efficient
