+ Passive House Project

Come learn how to
build the first Passive
house in Oakland.
This house will be
airtight and super
energy efficient.

What's new in the Carpentry Dept?

We are doing some very interesting projects.
Using energy efficiency and Passive house
principals. Join us in rebuilding a burnt out
house using passive house technology. Learn
about Sustainability or send your crew in to
have safety training for the job site. Come
learn how to do blower door testing and use
an infra – red camera to detect air leaks and
cold spots in your home.

Tiny House

Dandelion Project

Come finish building our 144
sq. ft. tiny house. Built on a
trailer and almost completed.
Learn the finish carpentry
skills and tiny house principals
needed to build your own tiny
house or cottage.

Coming this Fall a **FABLAB** @ Laney College
