

Table of Contents - Chemistry 1A Laboratory Manual

Experiment 1	Mass, Volume, and Graphing	1
Experiment 2	Metric Measurements and Density	11
Experiment 3	Using Physical Properties to Identify and Unknown Liquid	15
Experiment 4	Paper Chromatography: A Technique of Separation and Identification	20
Experiment 5	Determination of the Empirical Formula of Magnesium Oxide	24
Experiment 6	Thermal Decomposition of Sodium Bicarbonate	28
Experiment 7	Hydrates	30
Experiment 8	Double Displacement Reactions	33
Experiment 9	Single Replacement Reactions	41
Experiment 10	Seven Unknown Solutions	45
Experiment 11	A Cycle of Copper Reactions	49
Experiment 12	Determination of Molar Mass Using the Ideal Gas Law	53
Experiment 13	Calculation of the Ideal Gas Constant	57
Experiment 14	Heats of Reactions	61
Experiment 15	Heat of Fusion and Heat of Solution	66
Experiment 16	Line Emission Spectra and Flame Tests	71
Experiment 17	Periodic Properties of Elements: the Alkaline Earth Elements and the Halogens	74
Experiment 18	Absorption Spectroscopy and Beer's Law: Analysis of Cu^{2+}	77
Experiment 19	Spectrophotometric Determination of Acetylsalicylic Acid in an Aspirin Tablet	84

Experiment 20	Acid-Base Titration: Standardization of KOH and Determination of an Acid Solution_____	87
----------------------	---	-----------

Appendix:

Chemistry Laboratory Rules and Safety Procedures_____	95
Equipment Checklist_____	96
Chemistry Laboratory Information Sheet_____	97
Significant Figures_____	98
Graphing_____	100
Procedure for Use of Spectronic 20D Spectrophotometers____	111
Procedure for Titration with Two Burets_____	113
Procedure for Titration with One Buret_____	114
