

Math 3C (42340) Information Sheet

TTh 1:00 – 3:15 pm

Fall 2019

Instructor: David Ross
Office hours: MTWTh 11:45 – 12:45 pm in G 201
Phone: (510) 464 3448 (messages only)
Email: dross@peralta.edu
Website: www.laney.edu/wp/david_ross/

Text: **Calculus, Multivariable**, by Thomas, 14th ed. (but any edition is fine for study purposes) It is not necessary to purchase the paper copy, but you will want to purchase MathXL to access the homework - this includes access to relevant portions of the e-text as well, as described below.

We'll cover material from chapters 11 through 16

Your final grade is determined by the following scheme:

15%	Homework
35%	Quizzes (about every two or three weeks)
25%	Midterm Exam
25%	Final Exam

Homework will be done online and handled by MathXL. See the back side of this page for instructions on how to create an account and gain access to the homework and relevant portions of the e-text. Homework will be due as described in MathXL, or in class, whichever date is later. You may continue working on homework after the due date, but a 25% scoring penalty is applied to any problem attempted after the due date. Extensions will not be granted. The two lowest homework scores will be dropped before calculating your homework average.

The quizzes will contain problems similar to problems in the homework. There will be no make-up quizzes or exams given. The lowest quiz score will be thrown out and replaced by the next lowest quiz score. For example, if all quiz scores were 92, 85, 87, 89, and 63, the average quiz score would be computed using 92, 85, 87, 89 and 85 (replacing the 63). If a quiz is missed, its score would be considered 0. It is the student's responsibility to drop the course, if desired.

Academic honesty is expected of all students. You are encouraged to work together on homework assignments, but for all quizzes and exams (including take-home) you are to work independently. For a quiz or exam, sharing any amount of your work or using any amount of someone else's work is considered cheating. Any student caught cheating should expect an F on the associated assignment; if the behavior is repeated one more time, the student should expect an F in the course.

Cell phones: Please either turn them off or set to vibrate mode. A ringing cell phone in class - or worse, answering a call in class - is not only rude behavior, it disturbs the class and it is a violation of the student code of conduct, for which you can be expelled from the course. *Using a cell phone/iPod or similar device during a quiz or exam carries the same penalties as cheating.*

Student Learning Outcomes:

- Construct and interpret models of circulation and force using vector valued functions.
- Evaluate derivatives and integrals of multivariable functions including the use of Green's Theorem, Stokes's Theorem and Gauss's Theorem.
- Create graphs for multivariable and vector valued functions.

How to Register and Enroll in Your Course

Welcome to MathXL! Your instructor has set up a MathXL course for you.

The course name is: Math 3C Fall 2019

It is based on this textbook: *Thomas' Calculus Early Transcendentals, 14e*

To join this course, you need to register for MathXL and then enroll in the course.

1. Registering for MathXL

Before you begin, make sure you have the access code that comes with your MathXL Access Kit.

To register or buy access, go to www.mathxl.com, click the **Student** button in the Register section, and then follow the instructions on the screen.

2. Enrolling in your instructor's course

After registering, log in to MathXL with your username and password. To enroll in this course, enter the following Course ID:

The Course ID for your course is: XL3C-71P4-5022-6DJ2
