Our electrical circuits are not up to code to handle the load of our cardio equipment and often trip our circuits. We are unable to add new equipment as our circuits cannot handle the load. We need air conditioning, as we only have fans, and the room temperature is too difficult to regulate for healthy workout conditions it is unsafe to have warm temperatures. Many of the windows are not operational, and there are different colored glass. There has already been an OCR lawsuit concerning the locker rooms and equality between men's and women's facilities.
