### Biology 10 – Introduction to Biology

Instructor: Leslie Blackie email: <a href="mailto:lblackie@peralta.edu">lblackie@peralta.edu</a> office hours: M/W 12-1pm office hours: T/Th 12-1pm

Website addresses: www.laney.edu/leslie\_blackie & www.laney.edu/amy\_bohorquez

**Required text:** Essentials of Biology w/Physiology, Campbell

Laney College Lab Manual

Recommended → Lecture workbook is available in the bookstore

**Description:** 

This class is an introduction to the science of biology for non-majors. We cover the fundamentals of biology for the non-major: Scientific inquiry, biological chemistry, cell structure and function, DNA and genetics, evolution and ecology, and an overview of living organisms. This class also includes laboratory exercises designed to complement lectures. As a first semester course, we will also be addressing study skills for Biology and biological thinking.

#### **LEARNING OUTCOMES - My Practical Goals for you**

- Take an active role in one's own education by taking personal responsibility for learning, learn to explain topics in students own words, understanding the need to stay on top of material given
- Discuss the correlations between environmental and socioeconomic issues
- Differentiate between a hypothesis and a theory in writing on exams
- Discuss the principles of biology as the study of living things including biological hierarchies, classification of living things, chemical processes of the cell and organisms.
- Improve confidence in scientific knowledge and ability to apply knowledge to related situations.
- Read and discuss articles related to current issues in biology. Form opinions on these issues and express and defend those opinions biologically in discussions and written essays.

#### LAB GOALS -

- Take personal responsibility for your own understanding of the application of science
- Cooperate with others working as a group, delegate work to others, collaborate with group.
- Use microscopes and other equipment correctly and care for them properly.

#### **ASSESMENT OF THESE GOALS**

#### WRITING ASSIGNMENT - To help you become more involved in the world of science...

You are assigned two writing assignments to complete this semester. For each testing section, you need to find a current topic in the news that relates to what we are discussing in class. Then, you will to write a 2 page of analysis on your article, 5-paragraph form. In the essay, be sure you address the topic, the name of the researcher or research group and where the research was conducted. You should explain what the research is, what benefit it has to the world, how it relates to the course material (a sentence that starts with 'this relates to class' is good) and why the research is important. See attached essay grading rubric for specifics on what is required of you, include the rubric each time you turn it in so we can see if you are improving. **Due the week before your lecture exam.** 

# STUDY GUIDE ASSIGNMENT - To help you prepare for exams.....

To encourage you to utilize the study guide to its fullest, you can earn points by answering all the questions on the study guide for exam 1 or 2. To earn full credit, you must write out the question then write out a complete answer. This may be a word, a sentence, or a long complex answer so be thorough. Try using a separate piece of paper for each section. We recommend that you complete the first one for credit, then you can increase your score if you need to with the second one. We're hoping that once you see how much it improves your scores you do this for all the tests. As well as increasing your test scores, you can earn up to 30 pts this way, so make sure you put in the time. **Due the day of the lecture exam (except final exam).** 

#### HOMEWORK ASSIGNMENTS - To prepare you for lab activities.....

There will be 2 assignments worth 15 points that you will finish at home before the lab on a similar topic. The first assignment will be preparation for your Chemistry lab. Both are on the website and due in lab.

#### LECTURE EXAMS - To assess your understanding of the material presented in class....

There will be three lecture exams (each worth 100pts) consisting of a material covered in lecture and reading from text. Tests may include multiple choice, true/false, matching questions and will be taken in the computer lab with a written section. You must be in the lab to take the exam with few exceptions. If you are late to an exam, you lose 1pt per minute after the start of the exam so be on time and there are no make-up exams are given, so be sure you're in class! If an emergency occurs, contact us ASAP.

It is a good idea to review your exam when it is returned to you. If you believe your answer is correct and you can explain it biologically speaking and also submit that in writing. Due 1 week from the date you took the exam.

### LAB WORK - To assess your ability to conduct experiments and answer questions on the material....

You are responsible for completing the work in you lab book during the lab session. To receive full points, you must show us your completed lab (summary questions and all) before you leave each day. This will count as your attendance and your lab points (5 pts per lab x 13 labs). Be sure you read the lab before you come to lab. If you need to miss a lab, you can come to a different section if you tell us ahead of time. You are welcome to check your answers at the end of lab or during office hours.

#### LAB PRACTICALS - To assess your understanding of the material you learned in the lab....

There will be 3 lab practicals give during the semester. These exams are designed to test your knowledge of both the experimental procedures and the hypotheses tested for each experiment. The exams consist of stations with questions for you need to answer within a limited time as well as a few short answer questions. Plan on the exam taking 1 hour, leaving early may result in a penalty. You may not leave the exam before being released by your instructor. We suggest making vocabulary and activity lists for each lab.

Be sure you are aware of tests that occur on a day that is not your usual lab day. Make arrangements beforehand, or talk with your lab instructor to pick a time that day if you have a conflict

#### PARTICIPATION - To be sure you are keeping up with the requirements of the class overall...

Each person is expected to attend class regularly, to be prompt, and to be well prepared. In lecture, you are graded on not just showing up, but participating and being prepared. In lab, this includes cleaning up your lab area before you leave the classroom, putting your microscope away correctly, pushing in your lab stool and being respectful of your fellow students, the instructor and the class. You will be given points dependent upon how well you achieve these goals. Everyone starts with 70% of participation points and those points will go up or down depending on you!

Calendar & Grades Page: We've included a calendar to help you get organized. Write in the due dates for assignments of other classes or dates other exams, work schedules, study times, etc. This is due in the 3rd week of class! The Grades Page due dates will be provided in class, so make sure you write it down.

## The grades you earn in this class are based on your performance:

| Syllabus & Microscope Quizzes (10 pts each) Calendar (10 pts) & Grades Page (2 x 5pts) Essays (2 @ 25 points each) Study Guide (for 1 test) Homework Assignments (2 @ 15 pts) Exams (3 @ 100 pts. each) Labwork (5pts a day) Lab Practicals (3 @ 50 pts) Participation/Effort (15 lecture/20 lab) | )                     | 20 pts 20 pts 50 pts 30 pts 30 pts 300 pts 65 pts 150 pts 35 pts                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------|
| TOTAL:                                                                                                                                                                                                                                                                                            |                       | 700 pts.                                                                                                                        |
| Letter grades are determined by percent:                                                                                                                                                                                                                                                          | A<br>B<br>C<br>D<br>F | 90 – 100% (630-700 pts)<br>80 – 89% (560-629 pts)<br>70 – 79% (490-559 pts)<br>60 – 69% (420-489 pts)<br>below 59.9% (<419 pts) |

<sup>\*\*\*</sup>Any late work will be penalized 2 points for each day is it late, so 1 week late = 14 point loss\*\*\*

#### **ACADEMIC INTEGRITY**

In the long run, dishonesty will not help you in school, or your professional career. Cheating includes using cell phones for any reason during exams, attempting to copy (or copying) any information from others on quizzes, lab practicals, exams or lab notebook information or anything else deemed cheating by instructor. **Do not talk during exams for any reason!** Ask me for help in you need it. The penalty can be a 0 on the assignment, a subtraction of points from your total, an "F" in the course and/or referral to the Dean of the College. See Department Policy if you have questions

### Asking Questions/Asking for Extra Help:

If you have a question during lecture, please raise your hand. If there is still confusion after Questions are not only welcome, but also encouraged. Remember! This class is your responsibility so let me know if you need help.

#### TENTATIVE SCHEDULE AND IMPORTANT DATES

May change if necessary

| Week of | Lecture Topic                                               | Chapter | Monday/Wednesday Lab                                                       | Tuesday/Thursday Lab                               |  |

<sup>\*\*</sup>last day to turn anything in!

**Extra Credit** is available through participating in Lake Clean-up throughout the semester. If you work on Saturdays, see me for alternative projects. Some options include visiting local museums and zoos. There is a limit of 1 extra credit assignment per testing section with a total of 30 points maximum. Once the test has been taken, the opportunity is lost so try to plan ahead.

<u>It is your responsibility to drop out from the class by College due date</u>. Do Not Depend on Me to Do That for You! Protect yourself from receiving an "F" for a class that you stopped attending at some point in the semester!

## **Biology Writing Assignment Grading Chart**

| Name | 1) Date | 2) Date |
|------|---------|---------|
|------|---------|---------|

You are assigned two writing assignments to complete this semester. These essays will be your evaluation of a recent article in the newspaper or on the Internet concerning a topic we are covering in class. I recommend using <a href="https://www.sciencedaily.com">www.sciencedaily.com</a> and check out that day's news.

- 1) Find a current topic in the news that relates to what we are discussing in class.
- 2) Write about 2 page of **analysis** on your article following the chart below using 5-paragraph form: Introductory paragraph
  - A. Catches the reader's interest
  - B. Gives brief background on your topic
  - C. Begins or ends with the thesis statement

Body (paragraphs 2, 3, & 4)

- A. Develops, expands, and/or supports the thesis statement
- B. Includes a topic sentence for each paragraph
- C. Includes supporting details which reinforce the topic sentence.
- d. Make sure you explain how it relates to class

i.. "This relates to class because..."

Concluding paragraph

- A. Restates the thesis or sums up the argument.
- B. Tells the reader what you think is important to remember
- C. Never introduce new information in the conclusion

<sup>\*\*</sup> These are due the week before the lecture exam, yet you can turn it in any time before then.

| Points                 | 5 – Great!                                                                                                                   | 4 – Good                                        | 3 – Okay                                             | 2 – Not okay                                        | 0                                                              |
