

You are expected to put in a minimum of 6 hours of study per week for a 3 credit lecture course. A time-honored study secret is available and is encoded below. Much of your study will be devoted to working the homework problems. One strategy is to attempt the even-numbered problems first. Unlike the odd-numbered ones, the answers to these are included in the appendix. Then tackle the assigned problems given below.

Here are the assignments.

Chapter	Problems	Due Date
2	45,47,49,53,57,61,73,77,79,87,89,95,99,103,105.	9/2

Scoring: Each assignment will be graded for completeness and spot-graded for correctness. Each will be assigned a maximum score of 10. A minimum of 80% of the assigned problems should be attempted. One assignment will be forgiven. Homework will count for 5% of your final grade. Late penalties will be assessed.

What if you get stumped?

You may find the path to enlightenment by any or all of the following:

- Bring your questions to the instructor at the beginning of class
- Make use of your instructor's office hour
- Email your questions to the instructor
- Take advantage of the college's chemistry tutoring services

Further suggestions

- Form study groups; find study buddies
- Don't fall behind
- Feel free to interrupt the instructor in mid-sentence or mid-equation
- Lectures start on time; don't be late
- Keep up with the class website at www.laney.edu/wp/lshaleger
