

Minutes of Meeting

Subject: Locker Finishes, Guardrail and Sunshade metal finish color

Project: Laney College Athletic Fields and Field House Project # 2338

Date: April 4, 2011 1:00PM 1:45PM

Attendees: For Laney College; John Beam, Jay Uchivim and Trent Tornabene for the District. For Gilbaine: ilia Florentin Scott Jewel, Tricia Heine and Erik Arevalo, CM Angel A. Alvarez

The meeting was organized to obtain The College's selection of finishes for Lockers and Outdoor Metal finishes.

Ilia Florentin presented the color selection chart for Lockers along with the recommended grey finishes suggested by the GEBT Architects. John Beam was expecting a mock up or at least a picture and he was deeply disappointed by the lack of samples. Scott Jewell suggested that he picks from the sample finishes and color chart the closest candidates to the materials that they might approve. After some consideration and input from Trent; John Beam relented and asked that actual physical samples be provided for him to really look at them, with some pictures if available. John picked 3 samples; one was Fusion Maple #7909-6, Manitoba Maple # 7911-60 and a darker wood #7954-60. During the course of the discussion Ilia pointed out that he must order the lockers before Thursday of this week. That the schedule is the big issue.

Two Metal finish samples were given to him to take back and discuss with his staff; one is a dark green which the AOR strongly recommends against and another white powder coated sample. John Beam was advised that an aluminum or silver color maybe a candidate from which to pick. He took both samples for consideration and will reply by tomorrow.

Ilia Florentin informed us all that by tomorrow we should have samples of the sample flooring for the Weight Room, Training room and other rooms from which to select colors. Samples of the Nora Flooring were actually available for view, Mondo is trying to match the colors scheme by Nora.

As a follow up John Beam said on 5-5-2011 that he is leaning toward the white metal finish but he wants to talk to GEBT Architects.
