Subject: Proposal for Laney PASS

Greetings President Webb,
Thank you for considering the attached proposal. We are open to your wisdom and suggestions.
We are excited about this opportunity to bolster needed services.
All best wishes,

Miriam

Laney College Student Success Project 2014-15

Funding Request Form

(Please type responses and submit electronically
to mjameson@peralta.edu by Monday, June 16, 2014)

Projects considered will be those that present a sound rationale for significantly improving student success by meeting one or more of the outcomes listed below. Collaboration among departments, programs and services areas will be given priority.

- Close the achievement gap through targeted student enrollment, instruction and instructional support services to better serve disadvantaged students residing within the boundaries of the District
- Fulfill or expand an instructional program that is not fully funded by the District Budget Allocation Model (BAM)
- Fulfill or expand a student support program that is not fully funded by the District BAM

Name of the Project: Grant Writer for disabled students
(Fulfill or expand a student support program that is not fully funded by the District BAM)

Purpose/Rationale of the Project:

The first function of the grant writer is to expand support services to at risk disabled students. The grant writer will seek funds specifically for students who have documented disabilities who are striving to reach their goals of academic success, transfer to four year universities and / or transition into jobs and careers.

The grant writer will identify resources and opportunities that can be shared with CalWORKs, EOPS and other categorical programs which serve disadvantaged Laney students.

The second function of the grant writer is to individually assist students in accessing and applying for scholarships.

Over the years DSPS has lost academic classes and support services. Students continue struggling toward their goals. With funds gained from community resources these vulnerable and valiant students will have improved access to academic success, transfers to four year universities and/or transition into fruitful jobs and careers

(Describe the scope and anticipated results, especially the impact on student success i.e. student persistence, course success, certificate/degree completion, transfers and job placements.)

Number of Students Expected to be Served:

Depending upon the number and scope of the community funds identified it is expected that 500 to one thousand students of all races, ethnicities and will benefit. Note: while the focus of searches

will be grants for students with disabilities, it is expected that grants for other community college populations will be found. In this way there is an expectation that a large number of Laney students will be positively impacted.

(The College is seeking to improve the outcomes of 7500 new and continuing students with specific priority to address the performance gaps among Black and Latino students.)

Project Implementation Timeline:

A search and hiring committee can be established upon approval of this proposal.

(The project should begin by August 2014.)

Assessment of the Outcome:

Each recipient will document their need and achieved outcome in written form. Tracking of the future performance and achievement of stated goals will be documented in a report available to the president and college council.

(Describe how you will assess the outcome each semester in order to reveal the effect of this project on student persistence, course success, certificate/degree completion, transfers and job placements.)

Budget:

\$125,000 salary/benefits for one year contract: Grant Writer.

(Detail the staffing, technology, facilities, and equipment needs. Provide approximate cost of each item.)
